# FACTORY & FACILITIES

**BHIMA**

**PT. BHIRAWA METAL MANDIRI**

## METAL PROCESSING MACHINES

Shearing machine with capacity of 70 tons capable to cut sheet steel with 2.500 mm length up to 4 mm thick.

Computerized Numeric Control/CNC turret punch machine to make various shapes for all kinds of plates up to 3 mm thick.

Bending machines with capacity up to 100 tons to bend sheet steel with length of 3.000 mm and 3 mm thick equipped with auto bending facility.

## MANUFACTURE

Production capacity: 2,000 cubicle/year with Modern manufacture facility

Quality control on each sub-process.

Paint qualification tested based on ANSI and ASTM Standard

Our factory is equipped with modern manufacture and testing facilities, We have around 50 skilled and semi skilled workers, experienced in manufacturing various types of enclosures and metal sheet products.
